INSPIRE 2020

Idea Name ReVoice

Aayush Santosh VIII A

Background Today if anyone needs information we have to navigate through multiple records files and then come up with the consolidated data

EG1 We go to a hospital The dr wants to know how many patients visited him had fever

Solution Today he will have to call a nurse attendant go over all the patients who visited him the particular day. Then read through all the files and then come up with the data

New Solution On my phone everyone has a MIC I will give a command Patients who visited Dr ABC today

Output List all the patients who visited dr ABC today.

Do you want any filters to be applied

Yes

Filter Patients having fever

Output Show the list of patients having fever

EG2 Before anyone goes for meeting in corporate world they all need data to talk on the topics to be discussed

Solution Today the leaders will have to tell their managers that please collect the particular data and send it to me

New Solution On my phone everyone has a MIC I will give a command Data for The particular topic

Output Relevant data is displayed

Do you want any filters to be applied

Yes

Filter For a particular industry only I want to see this data eg Manufacturing industry

Output Show the list of data related to manufacturing industry

Technology

Use Where all can it be used medical industry corporate world professional world etc

Advantages

Tedious efforts in data compilation Data Extraction Avoided

Instantaneous access to data with simple voice commands

Device Agnostic Easily available on all applications- Mobile Desktop Ipad Alexa or Google home
